

# STAT 901: PROBABILITY

Don McLeish

September 2003

# Contents

0.1 Preface . . . . .	ii
<b>I Part One</b>	<b>1</b>
<b>1 Mathematical Prerequisites</b>	<b>1</b>
1.1 Sets and sequences of Real Numbers . . . . .	1
1.2 Problems . . . . .	1
<b>2 Measure Spaces</b>	<b>2</b>
2.1 Families of Sets . . . . .	2
2.2 Measures . . . . .	6
2.3 Extending a measure from an algebra . . . . .	7
2.4 Independence . . . . .	8
2.4.1 The Borel Cantelli Lemmas . . . . .	8
2.4.2 Kolmogorov's Zero-one law . . . . .	9
2.5 Problems. . . . .	10
<b>3 Random Variables and Measurable Functions.</b>	<b>13</b>
3.1 Measurability . . . . .	13
3.2 Cumulative Distribution Functions . . . . .	16
3.3 Problems . . . . .	18
<b>4 Integration</b>	<b>23</b>
4.1 Great Expectations . . . . .	23
4.1.1 Properties of the Expected Value for Simple Random Variables . . . . .	23
4.1.2 Expectation of non-negative measurable random variables.	24
4.1.3 Some Properties of Expectation. . . . .	24
4.1.4 Further Properties of Expectation. . . . .	26
4.2 The Lebesgue-Stieltjes Integral . . . . .	28
4.2.1 Integration of Borel measurable functions. . . . .	28
4.2.2 Properties of integral . . . . .	29
4.2.3 Notes on absolute continuity . . . . .	30
4.2.4 Distribution Types. . . . .	32

4.3	Moments and the Moment Generating Function . . . . .	33
4.4	Problems . . . . .	34
<b>5</b>	<b>Joint Distributions and Convergence</b>	<b>41</b>
5.1	Product measures and Independence . . . . .	41
5.1.1	Joint Distributions of more than 2 random variables. . . . .	43
5.2	Strong (almost sure) Convergence . . . . .	44
5.3	Weak Convergence (Convergence in Distribution) . . . . .	45
5.4	Convergence in Probability . . . . .	49
5.5	Fubini's Theorem and Convolutions. . . . .	52
5.5.1	Convolutions . . . . .	53
5.5.2	Properties. . . . .	53
5.6	Problems . . . . .	54
<b>6</b>	<b>Characteristic Functions and the Central Limit Theorem</b>	<b>59</b>
6.1	Characteristic Functions . . . . .	59
6.1.1	Transforms and Characteristic Functions. . . . .	59
6.1.2	Properties of Characteristic Function. . . . .	60
6.1.3	Characteristic function of $N(\mu, \sigma^2)$ . . . . .	63
6.2	The Central Limit Theorem . . . . .	64
6.3	Problems . . . . .	65
<b>7</b>	<b>Conditional Expectation and Martingales</b>	<b>71</b>
7.1	Conditional Expectation. . . . .	71
7.1.1	Properties of Conditional Expectation. . . . .	74
7.2	Conditional Expectation for integrable random variables. . . . .	76
7.3	Martingales in Discrete Time . . . . .	76
7.4	Uniform Integrability . . . . .	86
7.4.1	Some Properties of uniform integrability: . . . . .	87
7.5	Martingales and Finance . . . . .	88
7.5.1	Theorem . . . . .	88
7.6	Problems . . . . .	89
<b>8</b>	<b>Martingales in Continuous Time</b>	<b>93</b>
8.1	The Brownian Motion Process . . . . .	95
8.2	Introduction to Stochastic Integrals . . . . .	97
8.3	Extending the Ito Integral to $\mathcal{L}_{LOC}^2$ . . . . .	102
8.4	Ito's Formula . . . . .	105
<b>9</b>	<b>Review Problems.</b>	<b>111</b>

## 0.1 Preface

# STAT 901 COURSE DESCRIPTION, Fall 2003
